

Project Key Facts

Product: PU4223CS

Aggregate: SBR 1-3mm

Area: 3m²

Date: Dec 2015

Wheelchair Ramp

A wheelchair user in need of adequate access to their home commissioned a ramp of rubber crumb to be installed. Rubber crumb is a strong and sturdy material for ramps with anti-slip properties and will effectively absorb impact from falls and trips. It is comfortable to walk on, is non allergenic and nontoxic making it pet friendly. As it is permeable there won't be any standing water to cause problems and the quality of the sealant will mean there won't be any cracking issues. The surface of the ramp will remain smooth and flat which will be safer for longer for the resident.
