

Project Key Facts

Product: Mulch Surfacing PU5380

Aggregate: Mulch Rubber

Area: 12m²

Date: 2012

Edgewick Park Play Area

Edgewick Park in Coventry installed play equipment for children including a slide and climbing frame. The developers were looking for a surface that would absorb the shock of falls from height but didn't want the mulch to make a mess of the surrounding area. Leeson's mulch binder was the perfect solution as it contains the rubber within the play area so it is always around the equipment without leaving any bare patches.

Edgewick Park has faced challenges over the years but now it is a family friendly space and provides a venue for a weekly community mile, nature and parklife events, and outdoor concerts.
