

Project Key Facts

Product: PU5380

Aggregate: Mulch

Area: 15m²

Date: December 2015

Public House Play Area

Leeson's PU Rubber Mulch was installed into a popular country pub in their children's play area. It was chosen for its fast-curing properties, its excellent slip resistance, its flexibility and that it is a solvent free resin for bonding rubber mulch systems. The rubber mulch system is porous and rainwater drains through, it is harmless to the environment and doesn't rot or decompose eliminating the need to be replenished. It is a safe surface in parks and play areas and acts as a barrier to weeds whilst increasing soil moisture beneath. The versatile system can be designed in bright colours or kept to a natural look depending on the environment.
